Procurement Manager (m/f/d)

Description

CARNEADES: We are a strong team of international experienced consultants who actively shape the project management of our clients. Specialized in on-and offshore wind energy as well as grid connection projects, we support with our profound experience and "best practice" know-how. We want you!

Responsibilities

- In close cooperation with various project teams, you are responsible for the planning and implementation of purchasing activities, partly in EU tender procedures
- The targeted development of existing as well as the selection of new suppliers falls within your portfolio
- You conclude framework agreements independent according the company's requirements
- You identify opportunities and measures to increase efficiency and optimisation of the supplier base
- You create and consider orders and requirements according the supplier contracts, monitor delivery times/-dates and costs and implement risk assessments

Qualifications

- We are looking for a fellow campaigner with several years of relevant professional experience in technical purchasing, project purchasing or project management
- You have a successful degree in industrial engineering, economics (or similar)
- You have communicative, collaborative and strong negotiating skills
- We are pleased about a strategic mindset with empathy for technical and commercial issues
- Fluent German and English skills (written and spoken) as well as willingness to travel complete your profile
